Modern^b
Multimeters

Doug Millar
K6JEY

For Comparison

Fluke 8060A

1981 vintage

Does dB
relative to 600Ω

No data logging

Rustrack Data Logging

This was easier than
Industrial units.

Most were digital
Versions of this with
Poor interfaces.

Modern DMM's

- A lot is changing and will change.
 - External data logging programs via
 - USB, LAN, Bluetooth and Wi-Fi.
 - Better displays
 - TFT with excellent contrast
 - Colors
 - Much more information
 - Firmware updates
 - DBm measurements referenced to Z

Some Measurement Examples

- Use a receiver output with a multimeter for sun and moon noise measurements
- Use an HP8970A/B with sp. Functions 9 for Sun and Moon noise measurements plus documentation.
- Power measurement from the DC jacks/ recorder output on a power meter. (eg HP437, Anritsu)
- Frequency drift over time on your radio.
- Measurements can be in dBm or dBV at a fixed resistance and to a reference level.

Focus of the Talk

■ 7 Different meters

- **Siglent** SDM3045x 4 ½ digit (60K counts)
- **Agilent** 34410A 6 ½ digit
- **Uni-T** UT181A handheld 4 ½ digit. (60K counts)
- **Uni-T** UT 61E+ handheld 4 ½ digit (22K counts)
- **Uni-T** UT60BT Handheld (9.9k counts)
- **AN9002** Handheld (6K counts)
- **MEET** Pencil DMM

Siglent SDM3045,55,65

- Very similar to an Agilent 34461A (\$1,300+)
- Does data logging and trend analysis live. 1 Gb of memory and thumb drive.
- Does dBm at Z or dBV
- Simple Recalibration
- 1 GB of memory +USB

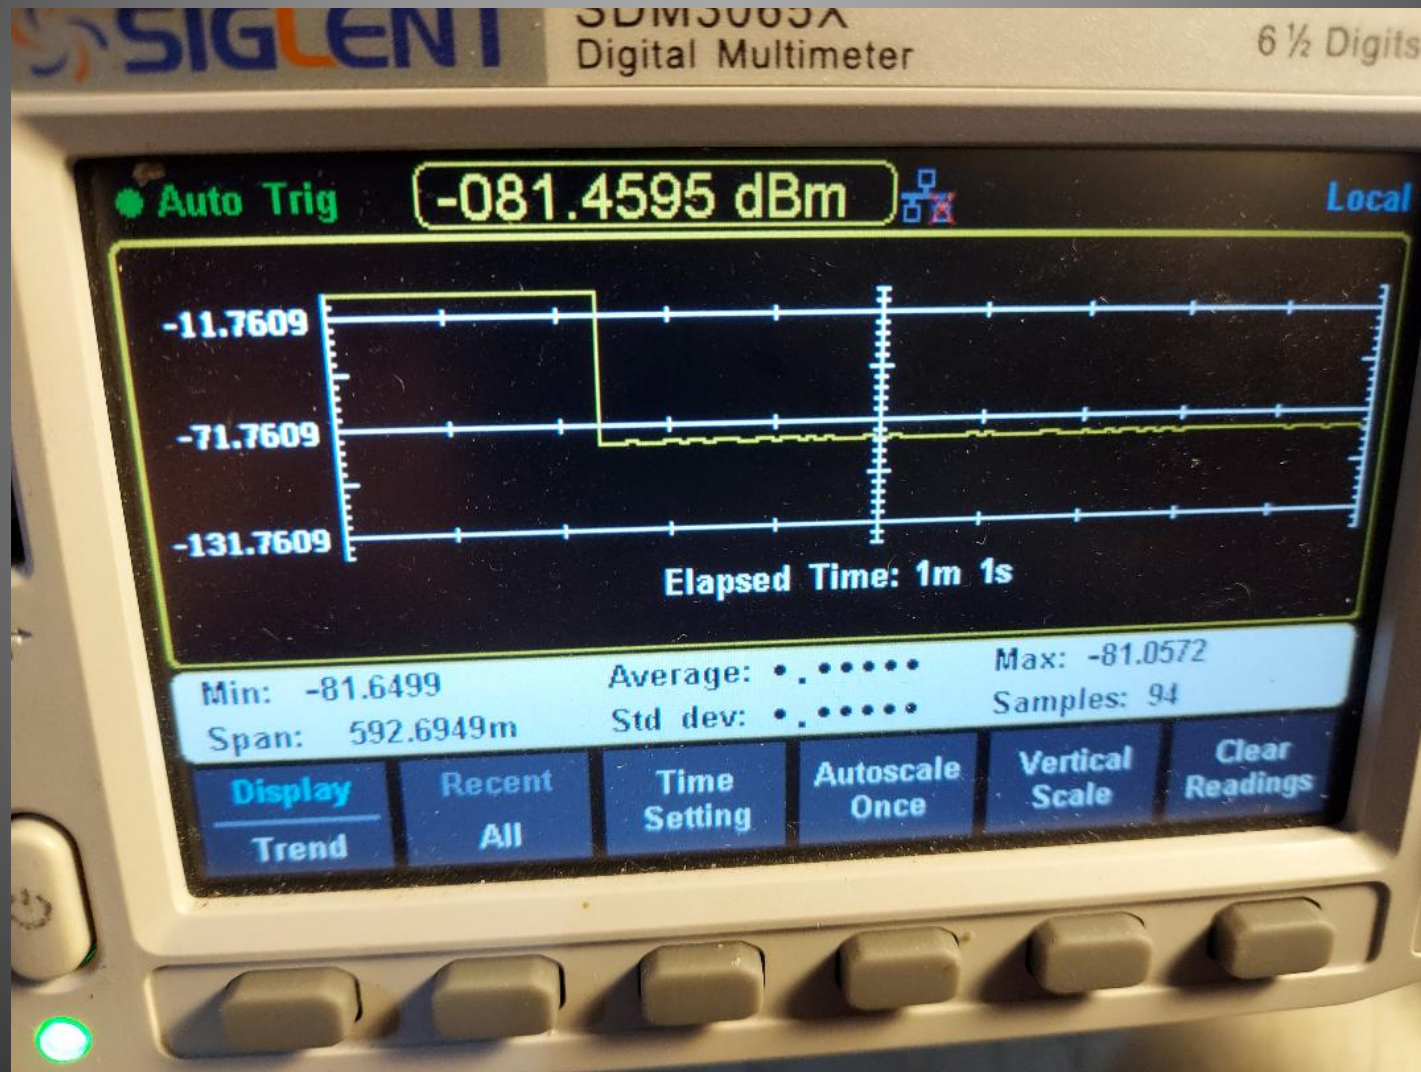

- 4 ½ digit \$300
- 5 ½ digit \$450
- 6 ½ digit \$600

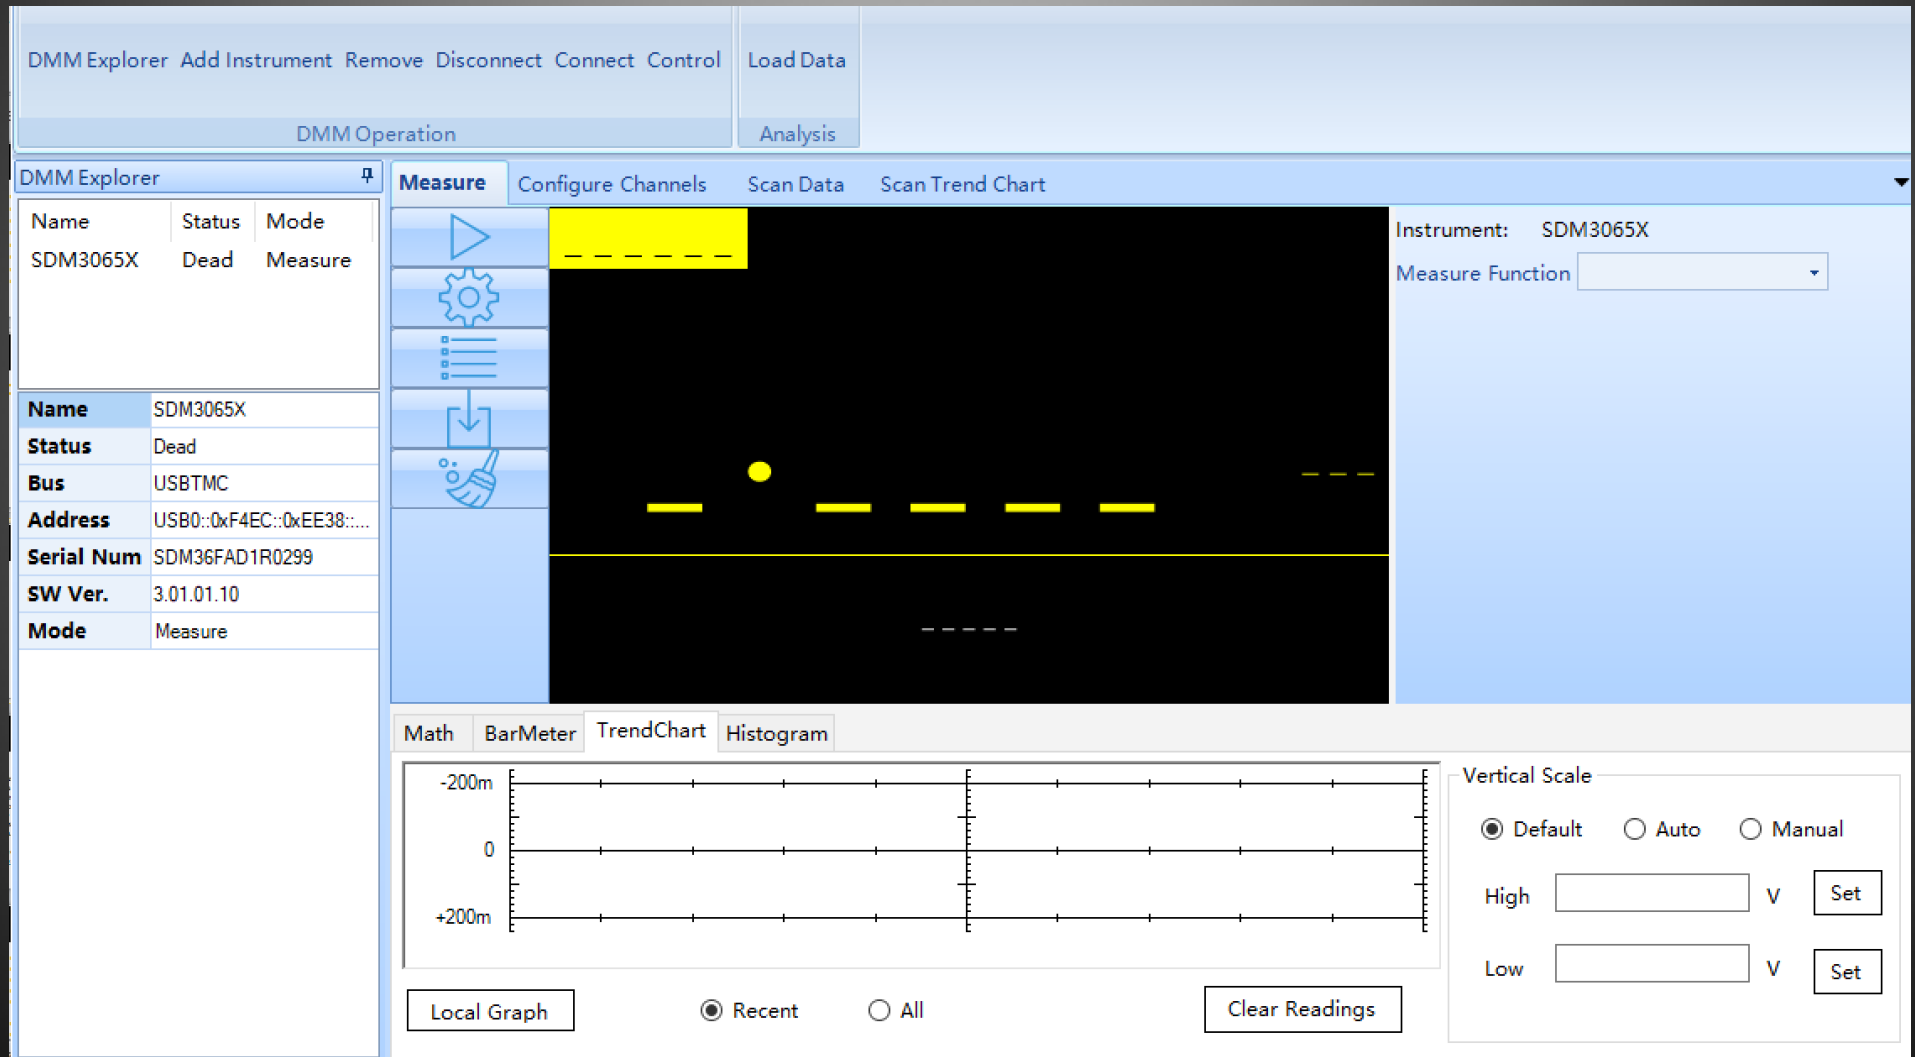

Trend Display Data Logging

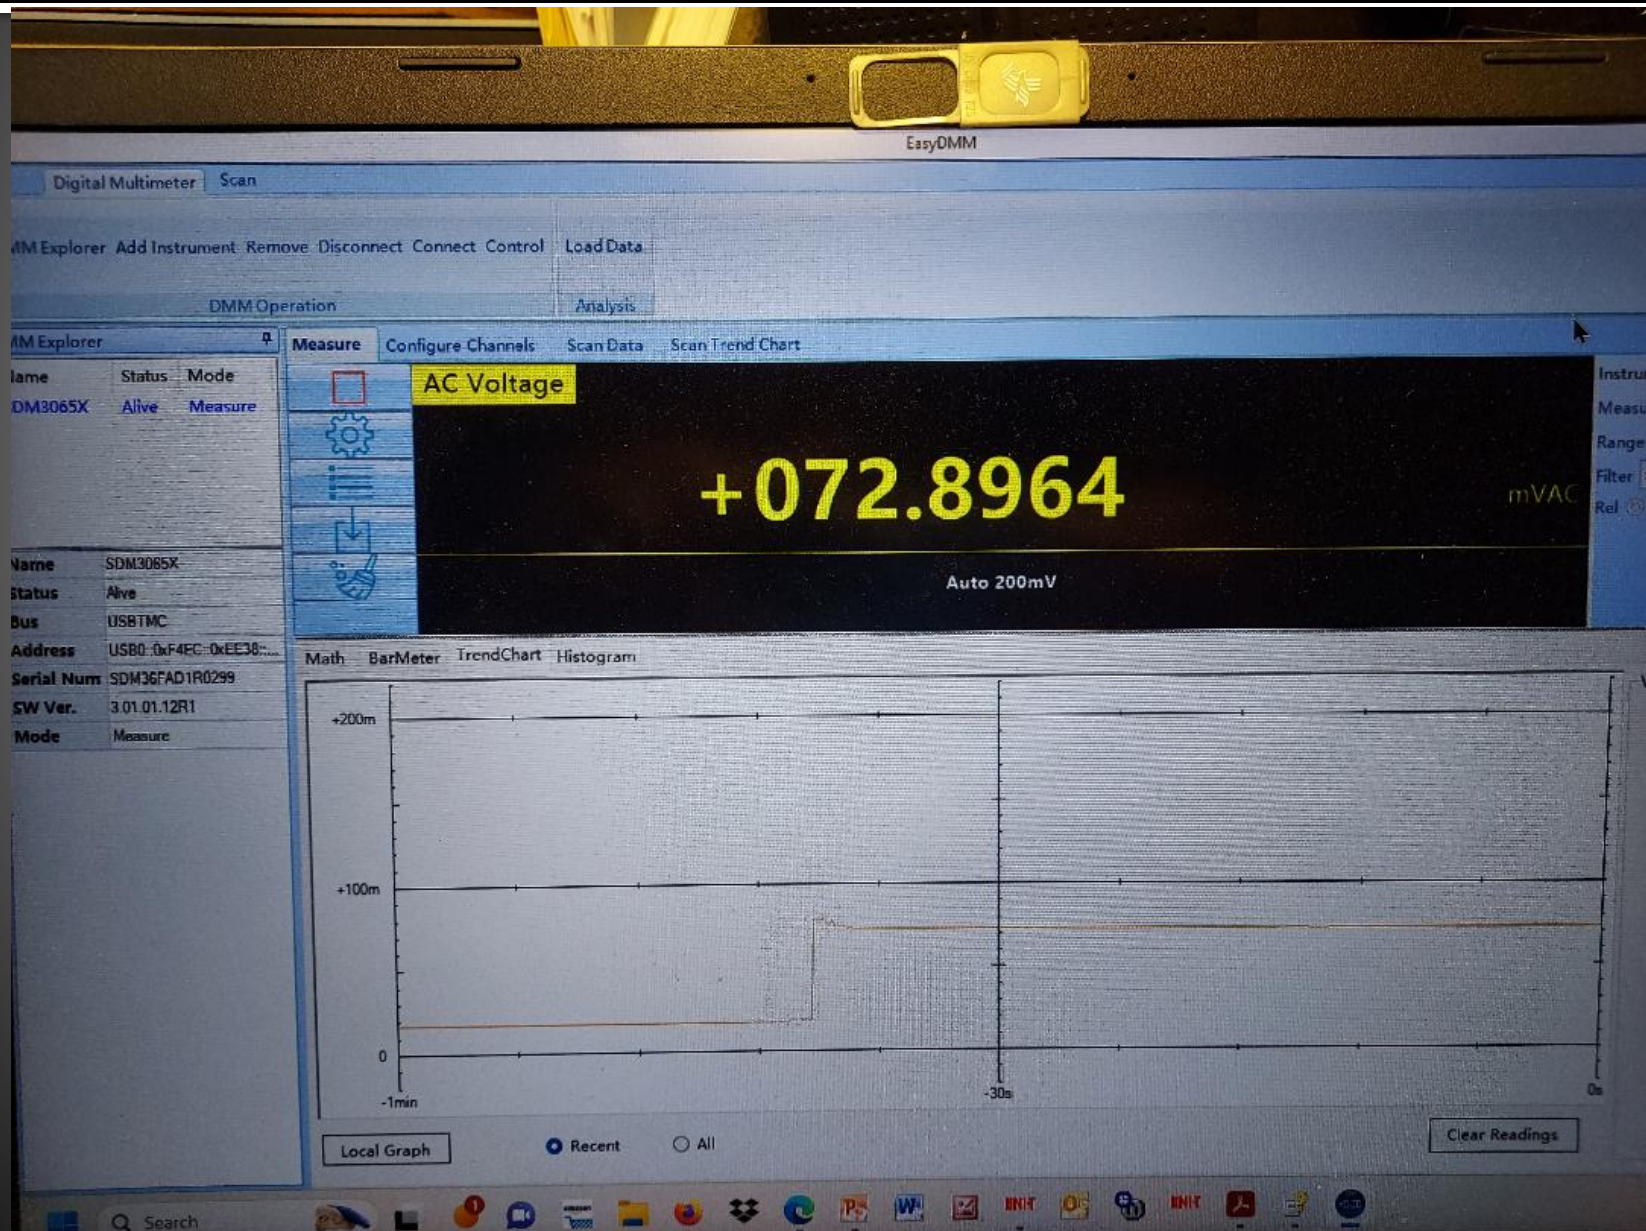

Siglent dBm

Siglent DMM Explorer Program

DMM Explorer Trend Data Via USB

Local Graph

Agilent 34410A

- Updated (2005) and improved 34401a (1993)
 - Internal data logging program via LAN.
 - Internal averaging
 - Other models have
 - Auto calibration and data logging trace. (\$\$\$)
-
- External Pathwave DMM prog via USB or LAN. Has excellent graphing.
 - The dBV or dBm ref. to Z. is easy. **Get free basic version.**

Keysight Pathwave

- First rate program
- Averaging gives you one more digit (34461a)
- Get Pathwave as a free download.
- Regular BenchVue is \$65/yr.
- LAN and USB connections are easy
- LAN can conflict with Wi-Fi.

Pathwave DMM Free version

BenchVue DMM Paid App and 34410A

HP34410a Remote Mode

- Run LAN/USB cable to computer in Pathwave DMM app.
- LAN to portable Wi-Fi router should also work
- Great for working on antennas and monitoring the radio.

Agilent 34401a

Notes

■ 34401a

- Uses a Null Modem-DB9 connection.
- Startech.com FTDI to null modem DB9 adapter cable should work. \$45
- Keysight serial cable instructions-

■ [Keysight Serial cable Instructions](#)

- Meter will measure dBm.
- Excellent meter but 1993 vintage (\$200)

UNI-T 181A

- Hand held
 - Bigger than average.
 - Excellent sharp display
 - Extensive data recording
 - Accurate and very fast
 - External USB/Bluetooth
 - Firmware upgradable
 - Recording and graphing are internal and External.
- About \$280

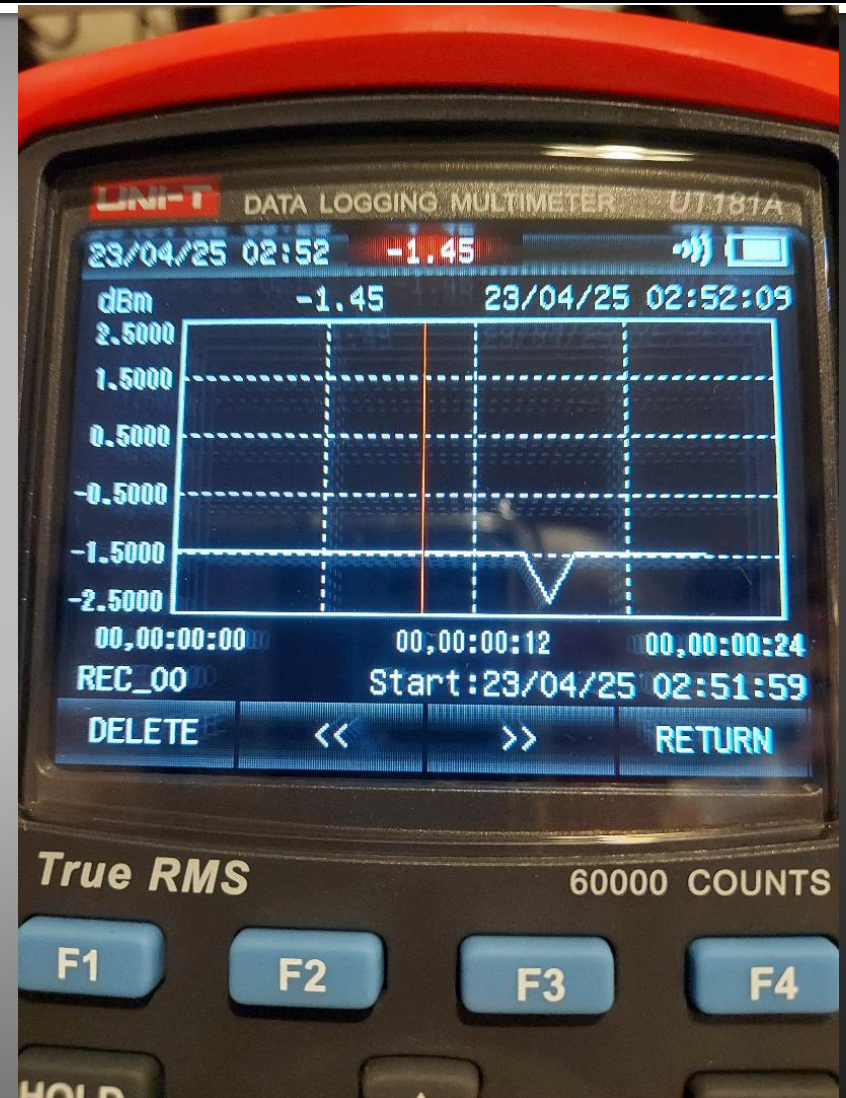

Relative dBm at Z and Record

DBM referenced to Z

Save and Trend Views

UT181A

Data Logging

Use either

Internal data display or

External program via USB

Or via **Bluetooth to Android**

Easy set up! Live graphing.

Record data then get graph.

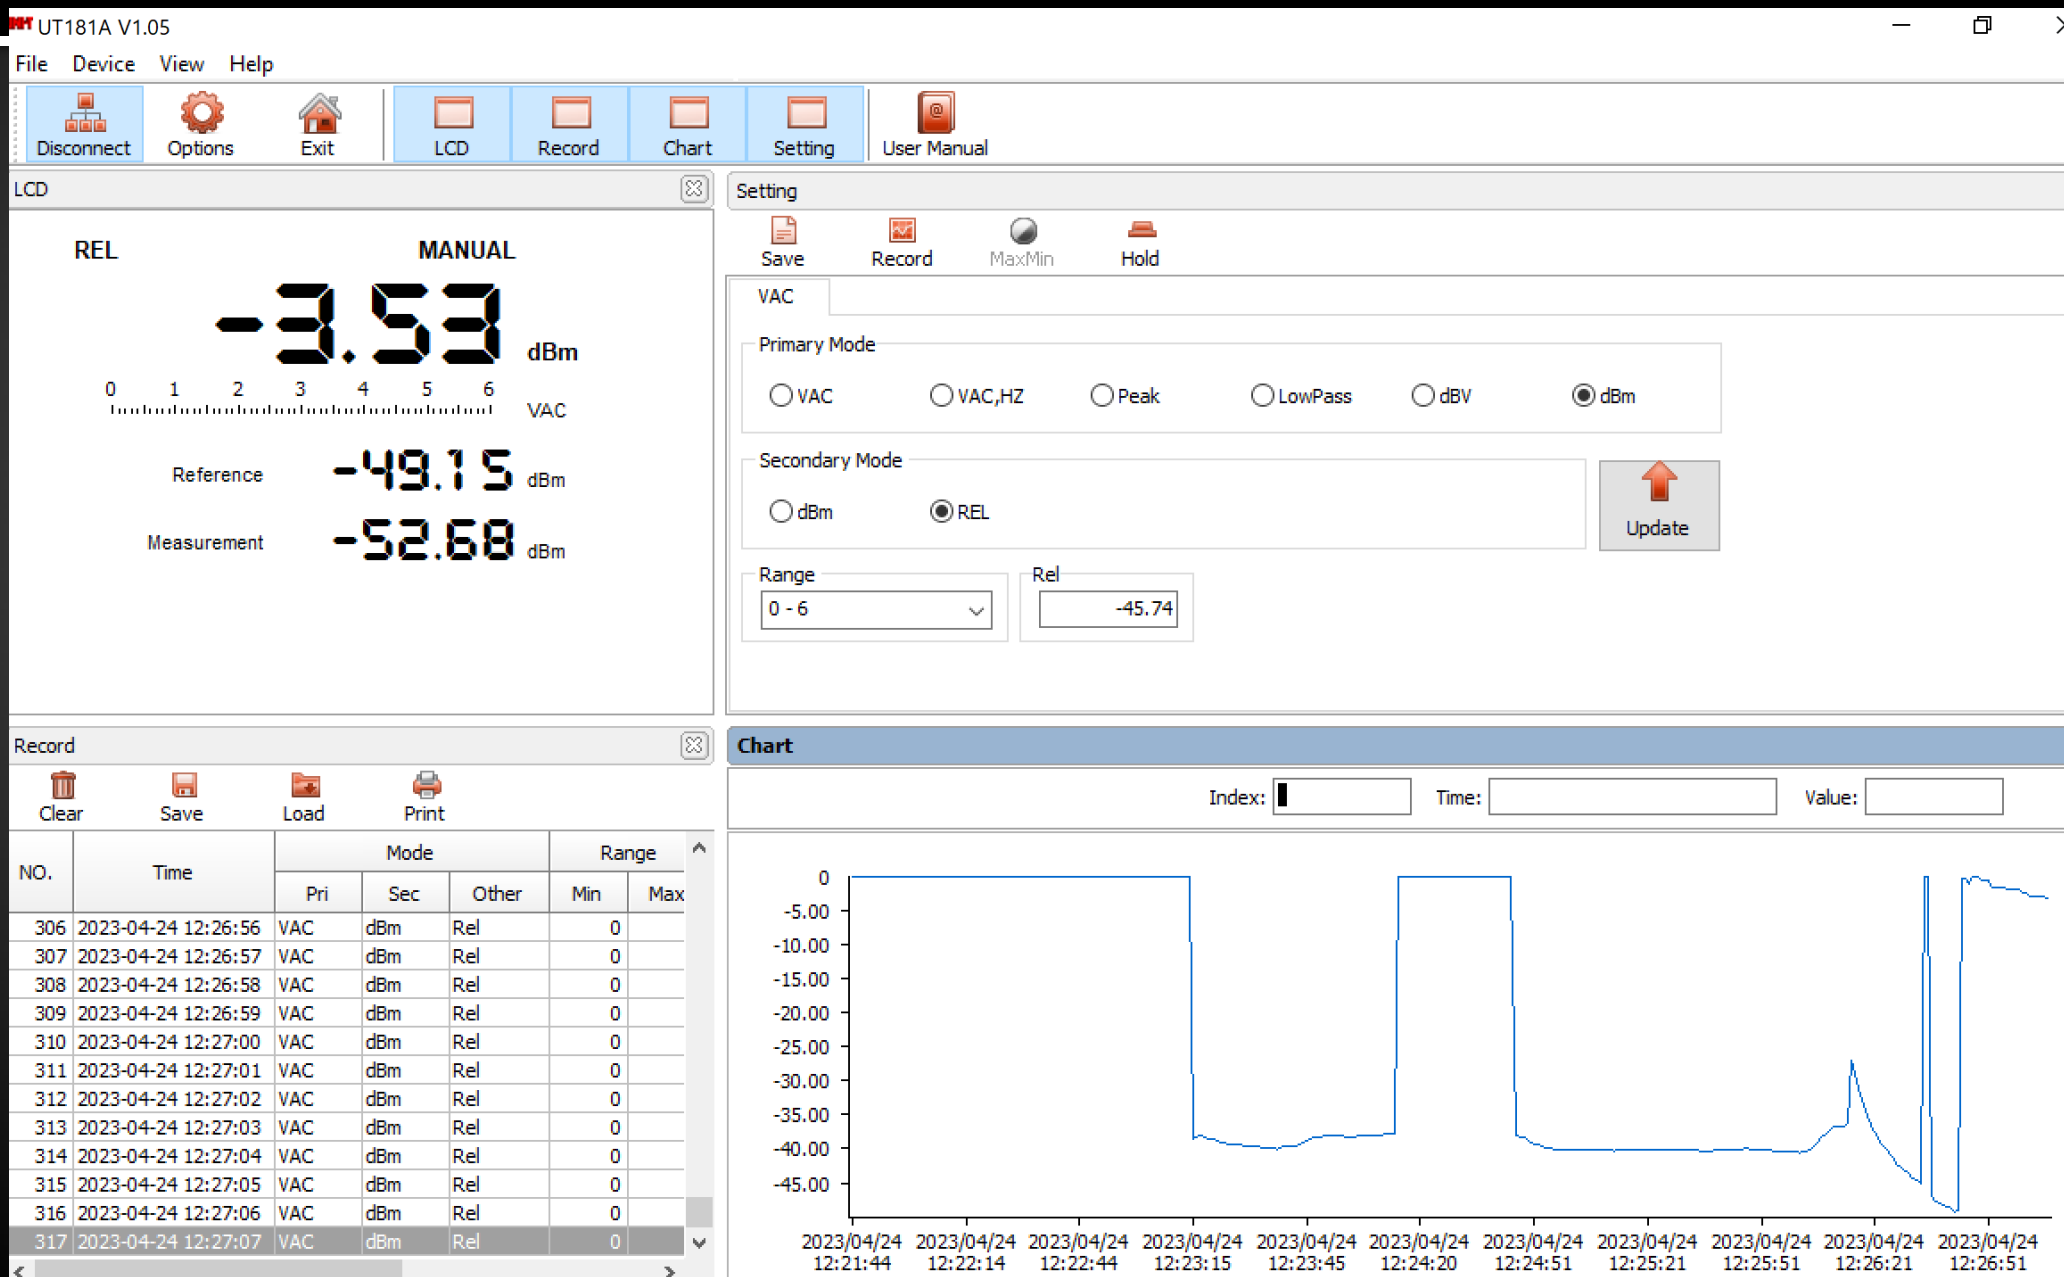

Use up and down to scale graph.

dBV or dBm

20,000 data point memory.

Software for UT181A

UT181 dBm Measurement Chart

UNI-T Program Notes

- Chart can be full screened. Auto scaled.
- Window sections can be opened or closed.
- The Bluetooth programs are excellent.

Bluetooth Adapter

Works well with
UNI-T and *Android*
or *Apple*
Data program
BT 4.0

Adapter \$30

UT 181A via Android

You don't have
To be at the
Meter to read it!!

Recording live
in dBm

Try- the meter
at the radio
and

The Android
at the antenna

Data saved on
Phone and DMM

UNI-T 61E+

- UNI-T 61E+ \$85
 - Very accurate excellent Meter.
 - Has Relative measurement
 - Relative ACV measurement
 - No dBm measurement
 - No internal data logging
 - Has same Bluetooth adapter
 - and excellent program.
 - 22,000 counts
 - \$250 cheaper than UT 181

Android display Via Bluetooth

For dBV readings

1. Zero with relative button in AC volts position.
 2. Observe peak hold on chart.
 3. Calculate dBm from AC voltage difference.
- Comes with calibration cert.
4. Order one that comes with a case.

Uni-t UT60BT

- Very cheap at \$40
- Internal Bluetooth
- More limited
- Same program
- 9.9k counts

AN9002

- Cheap at \$50
- Excellent ext. Program
- Internal Bluetooth
- Slippery case.
- Cheap leads
- Display Lens not protected.
- Good display, though.
- 6k counts

MEET- Pencil DMM

- Relative and hold
- Bluetooth for external analog type meter.
- “ DMM without test leads”
- Data logging, and graphing
- Takes pictures of the setup.

\$35 Amazon

“MSBDTP1A”

Meter and Phone

Turn the phone
clockwise for this display

Turn it anticlockwise
and get the graphing
display.

You can take pictures of
the measurements.

No test lead wires!

Did I say **\$35** from
Amazon?

Extra ANENG 681

Color model available
Form factor of phone
USB charging
Excellent display
Auto function
Well built and sturdy
\$26 Best Bang/\$

Flashlight 5.0" Backlit Display Screen

Meter Comparison- Expensive

Siglent 3045x- \$300

- Best display and easiest to use, thumb drive storage
- Uses USB for remote program that works easily

Agilent 34410A- \$500

- Best accuracy, internal program hard to use. Outstanding ext. program BenchVue Basic (live graphing) LAN or Wi-Fi- USB

UT181A \$290

- Hand held, versatile, great display, accurate, many measurements and very fast. Unique bar graph.
- Internal graph, easy and excellent interface and program
- Graph after data on meter, but same time in ext. program
- Bluetooth app works perfectly for Android and Apple.

UT61E+ \$85

- Like the 181- but no internal data logging or dBm.
- Use Bluetooth and ext. program and ACV for logging.

Meter comparison- Cheap

■ Uni-t UT61BT- \$37

- Well built , good range, internal BT Good prog.

■ AN9002- \$28

- Cheaply made, Great Prog. internal BT

■ Pencil DMM- \$35

- A no brainer. No test lead DMM. Buy it.

Results

■ Worthwhile changes-

- The addition of data logging and graphing programs.
- USB and LAN connections that are easy to use.
- Remote program via Bluetooth to phone.

■ Next Steps?

- More phone based apps via Bluetooth 5.3
- Wi-Fi to router to a laptop's Wi-Fi input to run Programs via Wi-Fi.

Example- Sun-Moon Noise

- Use a power meter like an HP437A or Anritsu ML4803A with averaging.
- Use a data logging DMM like the UT 181A at the recorder output of the power meter
- Use BlueTooth to link to a phone for live Graphing and storage.

At The Antenna

Conclusions

- The **Siglent 3045x** is an excellent lab meter with an easy to use USB program. Thumb drive storage.
- A good combination for bench and portable are the **Siglent 3045x** and **UT61E+**
- If you bought just one meter, the **Uni-T 181A** would be a good choice.
- Buy the Pencil DMM for \$35. No brainer.

Time for Questions

Doug Millar K6JEY
drzarkof56@yahoo.com

Many Thanks to Oliver KB6BA for his work on
Measuring moon noise with small dishes.
